Event Description

STEM Ambassador Dipak will talk about the role of the Chemist in medicine.

Join STEM Ambassador Dipak Sarker for a careers talk suitable for secondary students aged 14+ on the role of the Chemist in medicine, arranged to coincide with the Royal Society of chemistry's Chemistry Week.

Medicine as a discipline involves different aspects of the widespread use of medicines. However, it also involves understanding the action of poisons and drugs, study of the causes of disease, body structure, surgery, diagnosis, scans, and the use of false body parts.

- Dipak will explain how the Chemist contributes to the doctor, surgeon, vet, dentist, pharmacist, radiographer, coroner, nurse and the patient.
- He will talk about the role of the pharmacist for example a pharmacist must know about medicines, which are molecules that have a direct effect in the body, but medical people must also know about antibiotic action, destroying diseased tissues, medical scans, using medical test kits such as the Covid lateral flow test,
- Dipak will talk about the crucial role the Chemist plays in all aspects of medicine.

Dipak is a lecturer in Materials Science at University of Brighton. Following the talk there will be a short Q&A session where students will be able to ask questions related to careers in Chemistry.

Career Talks: MEDICINE AND THE ROLE OF THE CHEMIST WITH DIPAK SARKER

Friday 12th November | 08.45- 9.15am

FREE Online Careers talk for 14+ *secondary aged students*
