Background

This year's 9th Green Design Biennale organised by Sarajevo Green Design Foundation and City of Mostar brings together international networks and knowledge, in the field of green and circular

SARAJEVO GREEN DESIGN FOUNDATION

design, into a unique multidisciplinary, multi-layered and creative events which is marking the October days in Mostar. Green Design Biennale involves all scales of design from product scale to urban scale. Number of exhibitions, lectures, town hall discussions and workshops will be organised that will address the state of the art in sustainable design and dilemmas that product-design, interior, graphic design, multimedia, architecture, urban design, production industries are facing in the 21st century.

Sarajevo Green Design Foundation's objectives through this International manifestation are to:

- highlight the role of a good quality design in the modern world;
- bring focus to sustainability and green design;
- bring together designers, academic institutions and manufacturers;
- inspire new types of collaboration that will provide more intelligent and green design solutions.
- promote development and results from innovation platform and creative laboratory for green design in Mostar.

Special part of this year's program will be the opening of the first phase of the Innovation park for Circular and Green Building Design (Green Design Centre for South East Europe) in Mostar. GDC has been initiated and founded by Elma Durmisevic Founder and President of Sarajevo Green Design Foundation with support of City of Mostar and Dutch Embassy in Bosnia and Herzegovina.

Green Design Centre is to become educative public information centre showcasing new concepts and technical solutions for the realization of Dynamic and Circular building concepts and circular use of building materials, water, food, and energy within the built environment. As such Green Design Centre is envisioned as a Innovation Park and design Laboratory.

GDC is showcasing reuse of historic sites and promotes methods to transform and revitalise historic buildings and site by reusing existing structure/ fabric as a socio-cultural and material backbone that sustains the identity and the meaning for the new dynamic programs. GDC building itself is a true showcase of such approach. It provides place for community involvement through co-creation sessions. It promotes eco urban / permaculture development / local food production. It promotes use of green on and around the building for water absorption, cooling effects and air quality and there are different measurements that are taking place in and around the GDC.

GDC contributes to developing a knowledge. It is a LAB and a platform for testing and monitoring built environment and will support decision making and strategy development for Sustainable Cities and Communities.

SARAJEVO GREEN DESIGN FOUNDATION

Overview of the Program Draft 2022

Location: Mostar

DAY OPENING: Wednesday 12 October 2022

17:00 – 18:00 o'clock Mobility expo / exhibition of electric cars – tesla..., Foldable electric car by Israel SMART team, first self-made BH electric car, BH electric carting, electric bicycle. Location: city central square and park

18:00 – 18:45 o'clock

- Opening Sarajevo Green Design Foundation
- Mostar City Mayor
- Dutch Ambassador
- Rectors of Universities
- President of the **Architects Council of Europe**
- EU Digital Deconstruction Project representative
- EU H2020 Buildings as Material Banks Project Representative

18:45 Classic Music Intermezzo

Opening lectures Vision 2020 19:00 – 20:00 o'clock

- Elma Durmisevic, Amsterdam/Sarajevo, **Reversible architectural design, and digitalisation a key to Climate proof Building** (Founder of Sarajevo Green Design Foundation and EU Laboratory for Green Transformable Buildings in the Netherlands)
- **Circular Buildings**
- Ruth Schagemann, Germany, **Circular architecture**

20:00 **Opening Green Design Exhibition and reception**

DAY TWO: Thursday 13 October 2022

18:00 – 18:30 o'clock

ACE Architects Council of Europe Session

SARAJEVO GREEN DESIGN FOUNDATION

- New European Bauhaus Forum BiH ACE Selma Harigton, Irland
- Circular building taxonomy Carl Backstrand, White - Stockholm, Sweden

18:30-18:45 Townhall Meeting - potential fields of collaboration ACE and SGDF/GDC

18:45 – 19:00 o'clock

- Jean Yves Luxemburg, Bridging the technological gap for **Circuair Buldings & digitalisation**
- Iva Kovacic TU Vienne Vienna, **digital twins**
- Birgul Colakoglu/Istanbul Digital **Architeture**

19:00 – 20:00 o'clock

Green Fashion Show/ Location public square

DAY THREE: Friday 14 October 2022

14:00 – 16:30 o'clock

Students workshop “reactivation of city’s neglected spaces”

Presentation of students workshop results and walk along the intervention sites

18:00 – 18:45 o'clock Heritage session

- Senada Demirovic, Mostar, Mostar Intervention sites
- Igor Kuvac, BanjaLuka, Presentation of students workshop result
- Gil Paled, Heritage and UNESCO protected cities and Buffer zones

18:45 – 19:30 o'clock

- Bojan Spasojevic, Urban Green, **Mostar**
- Sanela Klaric BH Cerification **Green Building Council**
- Gilli Hobbs, **London circular city**
- Anna Quintas. C2C Intitute Amsterdam, **Materials and Health, Amsterdam**

20:30 Opening of EU Green Design Centre for South East Europe

Mostar rock school concert at the GREEN DESIGN CENTRE Location

**SARAJEVO
GREEN DESIGN
FOUNDATION**

DAY FOUR: Saturday 15 October 2022

Field visit Ljubuski Park including (roman wine route) wine tasting and lunch/dinner

PROMOTIONS:

E mobility

Urban Farming

New European Bauhaus Forum BiH ACE

Landscape design Centre

WORKSHOPS:

Green walk

Urban interventions by space reactivation

EXHIBITIONS

Architecture Exhibitions:

Student's exhibition

Country's circular building pilots expo : The Netherlands, Switzerland, Austria, Luxemburg
